CANNING FRUITS .- As the season of fruits is just commencing, anything that will enable it to be successfully canned at a small expense will very much prolong the season. Only those who have tried it know the satisfaction derived from eating a dish of peaches in midwinter as fresh as when gathered. The annexed method of canning fruit was furnished at the New York Farmer's club by Mr. Powers, of Oswego county, New York: "I will suppose your fruit and glass cans all ready. I prefer cans with glass covers. I scald the fruit in a large tin pan with juice or water to cover it. Put half a teacup of cold water into every can, and fill up with hot water. Put the covers and rubbers also into hot water. Now empty a can and fill up with hot fruit, and open another. Let them stand till the hand can be held upon them without burning. As soon as filled cut writing paper the size of the can, one tor each, and when cool slip one over the fruit paper with boiling juice, and seal at once.-Ladies, try this way; the fruit will never and Ground Bones mould, and keep any time, if you don't eat it. The papers keep the fruit from rising to the top of the liquid. There is no use of setting cans into water to heat them, or of putting them into quilted bags; it is too troub'esome. I let the truits shrink, and then fill up to the cover as close as possible."

BEGAN TO LAUGH. - A clerical friend, at a celebrated watering-place, met a lady who mental and physical suffering, so that she was to all observers an object of sincerest pity.

Some years afterwards he encountered this same lady, but so bright, and fresh, and youthtal, so full of healthful buoyancy, and so joyous in expression, that he questioned himself if he had not deceived himself with regard to indentity.

your cure? What means did you use to attain to such vigor of mind and body, to such cheerfalness and rejuvenation?'

"A very simple remedy," returned she, with a beaming face. "I stopped worrying and began to laugh; that was all.'

in commutation for rations for servant when I had no servant. There is enough enclosed to pay the interest on the same, and more too, as it did not amount to \$150 originally. Please deposit this to the credit of the United States.

So, it will be seen, there is still some "conis, that "conscience" has never yet touched furniture, books, jewelry, and articles of that

est to the ladies: When you receive a bouquet sprinkle it lightly with fresh water; then put it in a vessel containing soap suds; this will nutrify the stem and keep the flowers as bright as new. Take the bouquet out of the suds every morning and lay it sideways (the stock entering first) into clean water. Keep it there a minute or two, than take it out and sprinkle the flowers lightly by the hand with water; replace it in the soap suds, and it will bloom as fresh as when first gathered The soap suds need changing every three or four days. By observing these rules a bouquet may be kept bright and beautiful for at least a month, and will last still longer in a very passable state, but attention of the fair creatures, as directed above, must be observed, or all will perish.

DIRECT TRADE. - The Norfolk Journal of the 26th ult., says: "The U.S. mail steamship Worcester, Captain Graham, arrived at Lamb's wharf from Baltimore early yesterday morning, and immediately commenced loading. The Worcester is one of the Baltimore and Liverpool line-a fine propeller of about 1,000 tons capacity. Col. Lamb is the agent of the line in this city, and had placed on board by dark 178 hhds. and tierces of tobacco, and 106 bales of cotton, which was all that could be received on board. Consequently a considerable amount of freight was left in this warehouse. The steamship Carroll, of the same line, will suc ceed the Worcester, and leave Norfolk for laverpool in about a fortnight. The Worcester left last evening for Liverpool direct.

ARRIAL NAVIGATION .- The National Intelhgencer says: The subject of aerial navigation has been recently revived. One of our citizens, who has devoted years of patient study to the subject, has perfected a plan by which he proposes to travel with mails and passengers from Washington to New York in three hours. His theory has met the approbation of all the scientific and practical men who have examined it. He is no dreamer or enthusiast, but has arrived at conclusions after patient investigation and laborious study and experiment .-All that he needs for a practical illustration of

REMARKABLE Dog.-Mr. Peter Mauck, of this city, has one of the most remarkable dogs living, beyond a doubt. This dog goes into the water and catches fish without the aid of hook or line, and brings them ashore and puts them at his master's feet. This is no exaggerated fact, as several most respectable gentlemen will testify. - Lynchburg News.
